**Submersible level transmitter designed for continuous level monitoring.**
The Sub-X™ transmitter measures the hydrostatic pressure of the water above the sensor and outputs a 4-20 mA signal proportional to the level. The robust design provides a reliable and low maintenance solution for level control applications, including:

- Sewage and effluent lift stations
- Stormwater pump stations
- Non-potable water systems
- Tanks, wet wells and reservoirs

**FEATURES**

- Transmitter wetted components are designed with non-conductive materials to provide an electrical isolation barrier
- Pressure sensor isolated from process material by a protective VITON® diaphragm
- Industry standard 4-20 mA, 2-wire loop powered
- Reverse polarity protected
- 18/2 shielded cable with vent tube
- Provided with removable lock in place stabilizing weight and stainless steel mounting bracket
- Multiple ranges
