SJE VERTICALMASTER® II LC CONTROL Switch

Mechanically-activated control switch designed to activate low current control panels and alarms.

This control switch offers reliable control for AC and DC applications in non-potable water, and wastewater. The internal switching mechanism has sealed gold cross-point contacts for reliable low current operation. Common applications include PLC (programmable logic controller) panels, IS panels, with intrinsically safe barriers, low current solar barriers, low current solar applications, and other low current control panel and alarm applications.

The SJE VerticalMaster® II LC (Low Current) switch is not sensitive to turbulence.

It is available in normally open (high level) operation only.
