The VARIOspeed® 3R control panel is designed to control (2) three phase pumps in constant pressure control applications including booster pump, deep well submersible pump, and irrigation pump applications.

As flow and head conditions change in the pumping system, the VFDs are able to automatically control the pump speed and maintain a constant discharge pressure. The desired set pressure is entered on the display inside the panel. The pressure transducer measures the pump discharge pressure. Not for use with sewage pumps.

**FEATURES**

- Run dry protection (pipe burst or run dry protection)
- High pressure protection
- System fault log
- Standard package includes a 0-200 PSI pressure transducer (one-year limited warranty on pressure transducer)

**COMPONENTS**

1. Enclosure measures 24” x 20” x 8” (61 x 51 x 21 cm) (up to 5hp) and 30” x 24” x 10” (72 x 61 x 26 cm) (7.5 to 20hp) steel NEMA 3R for indoor or outdoor use
2. Vents for VFD cooling
3. Fan and thermostat for 7.5 HP and larger HP models
4. Raised terminals for easy field connections
5. Circuit breaker disconnects
6. Variable Frequency Drives
7. Fan control circuit breaker (240V models only)
8. Control transformer (480V models only - not shown)
9. Externally mounted run indicator LEDs
10. Externally mounted pump Hand-Off-Auto selector switches
11. VFD display
   a. 4 Line/20 character display
   b. Rotary/push button for menu navigation and editing
   c. Left arrow button
   d. ESC button
   e. Run indicator LEDs
   f. Fault indicator LED
VARIOSPEED® 3R DUPLEX CONTROL PANEL - Variable Frequency Drive controller in a NEMA 3R enclosure for indoor or outdoor use.

</tbody>
</table>

**NOTE:** HP rating is based on standard NEMA B 4-pole motor (used for indication only, use nameplate FLA for sizing). The output voltage of the VFD cannot exceed the incoming voltage. Example: 208V in, 208V out (max).

SELECTING THE CORRECT VFD
1. Determine the voltage available on site.
2. Select a pump with the same voltage (motor must be three phase).
3. Check pump motor nameplate Full Load Amps (FLA) for proper VFD sizing.
4. Select a VFD with an output amp rating higher than motor FLA.
5. Use motor Service Factor Amps (SFA) for submersible well pump applications for VFD sizing.

PHASE CONVERSION**
It is possible to supply single phase 240V input power to VS23 models. The VFD output amp must be derated by 50%.
Example: The VS23-45.0-N3RD will be derated to 22.5A output (max).
**Use three phase input power if available. VS23 VFD’s are not UL listed with single phase supply. Always use a three phase motor.

MAXIMUM MOTOR CABLE LENGTHS
For 208V-240V pumps: 400 ft. For cable lengths greater than 400 ft., use a load reactor. Do not exceed 800 ft.
For 480V pumps: 50 ft. For cable lengths greater than 50 ft., use a load reactor. Do not exceed 300 ft.

SPECIFICATIONS
**POWER:** Available HP range
(208V-240V) 1.5HP - 20HP
(480V) 3HP - 20HP

**CONTROL:**
- PID control
- Adjustable electronic overload
- Auto Start on pressure drop (adjustable)
- Auto Stop on low Hz (No-Flow - sleep mode)

**PRESSURE TRANSDUCER:**
- 0-200 PSI (included) 1/4" NPT Male, NEMA 4X rated with 20 ft cable. One-year limited warranty on pressure transducer.

**ENVIRONMENTAL:**
- Operating temperature: 14°F to 104°F (-10°C to 40°C)
- Storage temperature: -4°F to 131°F (-20°C to 55°C)
- Altitude: Maximum of 3,280 ft (1,000 m) above sea level

SEE PRICE BOOK FOR PRICING.
